

Moral issue

Climate neutral data centers

Intention

The municipality wants to be climate neutral by 2040 and only offers space for circular data centers.

Explanation

The municipality only uses these circular data centers for its own data and data from parties affiliated with the municipality (welfare, care and education).

Other non-sustainable data centers are not welcome in the municipality and parties that use non-circular data centers are no longer allowed to provide services to the municipality.

The municipality actively measures whether the data centers meet the circular requirements.
